

Data Scientist
Based in Montpellier, South of France

About the Job :

Expernova.com, an expanding, innovative software company based in Montpellier, south of France, is seeking an experienced Data Scientist, fluent French speaker.

Your mission will be to :

- Improve existing algorithms & tools allowing to explore and analyze more and more data and provide accurate feedback.
- Develop new algorithms & new approaches to provide accurate indicators and forecasting statistics.
- Brainstorm with the other players of the team on how to improve the existing analytics and features for customers.

What do we require?

- Degree in BS in Computer Science or related fields with a strong coding inclination.
- Strong communication skills both written and oral, and a great team spirit.
- Proven experience in Statistics (i.e. statistical analysis, regression analysis, ...) and/or Artificial Intelligence (i.e. Data Mining, Machine Learning, ...) and/or Operational Research.
- A real ability to read scientific articles, to analyze critically, and to implement as appropriate.
- A Java experience

This is a great opportunity to work, learn and have fun ! We are ready to scale, join us to be part of it!

About the company :
